**Portland OR.**

"The job site is so wide open and involves some deep lines to be installed, so we needed a special system to handle the type of work we were doing. We've had no problems when we encountered the deepest cuts and the system is really allowing us to perform every facet of our work with maximum efficiency."

**-Bill Powell**  
**Gaines and Company**  
**Hunt Valley, MD.**

"When we needed a specialized attachment on one of our existing trench shields Efficiency had the capability to quickly re-engineer and modify it to meet our job requirements on a recent project. This saved us money overall and we were able to complete the job with no delay in production!"

**-Jack Dykstra Jr.**

**Grand Rapids, MI.**

"We owned a homemade trench box that was very heavy because of all of the welding it needed to keep it together. We decided that if we were going to dig 20 ft. deep we needed a good quality trench box. Now we use Efficiency's box for all sanitary pipe installations."

"Safety is the most important thing ... our workers would tell us we were crazy if we told them to get in some trenches without using a trench box."

**-Warren Reynolds**

**Woodhaven, MI.**

"The Slide Rail System was the best choice! We've tried others in the past but when we used Efficiency's system we were sold! It went in faster than sheeting and it minimized the vibration to the surrounding houses."

**-Fred Spielmann**  
**Central Florida Underground, Inc.**  
**Altamonte Springs, FL.**

"We are very pleased with the shielding system. It is an efficient way to provide shoring in areas where sloping could not be done. It was fast and easy to install and very user-friendly... We have already researched using the same system for our next project."

**-Cole Cattoor**  
**Belair Excavating**  
**Denver, CO.**

"Efficiency's innovative systems and their support team of engineers and installers are letting us look at projects that cannot be done with other types of shoring in our rental fleet. This gives Trench Safety Equipment and our customers a competitive edge at the bidding table and at the job site."

"The Slide Rail / Shore-Trak combination system is already very popular among utility contractors in New York and California, which bodes well for it's acceptance in the Northwest. It's the most versatile system in the industry and we think it's going to be a big part of our business here."

**-Mike Pritchard**  
**Shoring Plus, Inc.**  
**Kent, WA.**

"The Efficiency boxes we handle are known for their quality and performance in the field. They allow the contractor to provide maximum shoring security for his crews on underground jobs, plus they are rugged and dependable products"
